AMENDED CLAIMS

1. (currently amended) An optically decorative product, comprising:
a layer of transparent polymeric material having opposed surfaces, one of
said opposed surfaces provided with a plurality of parallel ridges and grooves;
an outer layer of single color substantially transparent-colored polymeric
material mounted to one of said opposed surfaces;
said layer of transparent polymeric material and said layer of single color
substantially transparent-colored polymeric material combining to produce in the
presence of light a color effect image such that said layer of transparent
polymeric material has an appearance other than that of a surface of said layer of
transparent polymeric material and said image being other than coincident with
said opposed surfaces.
2. (canceled)
3. (currently amended) The optically decorative product according to
claim 1 wherein said layer of single color substantially transparent-colored
polymeric material is mounted to said one of said opposed surfaces by a layer of
substantially transparent adhesive.
4. (original) The optically decorative product according to claim 3
wherein said layer of substantially transparent adhesive is a layer of substantially
transparent colored adhesive.
5. (currently amended) The optically decorative product according to
claim 4 wherein said layer of substantially transparent colored adhesive is a layer
of substantially clear single color colored adhesive of the same color as said layer
of single color substantially transparent-colored polymeric material.
6. (canceled)

7. (canceled)

8. (original) The optically decorative product according to claim 1 wherein said ridges and grooves are coated with a layer of reflective metallic material.

9. (currently amended) The optically decorative product according to claim 1 wherein said layer of single color substantially transparent-colored polymeric material is mounted to said opposed surface provided with said plurality of ridges and grooves by a layer of substantially transparent adhesive.

10. (currently amended) The optically decorative product according to claim 1 wherein said layer of single color substantially transparent-colored polymeric material is mounted to said opposed surface provided with said plurality of ridges and grooves by a layer of substantially transparent adhesive, wherein the other of said opposed surfaces is a smooth surface and wherein said optically decorative product further comprises a layer of product mounting adhesive applied to said smooth opposed surface.

11. (currently amended) The optically decorative product according to claim 1 wherein said layer of single color substantially transparent-colored polymeric material is mounted to said opposed surface provided with said plurality of ridges and grooves by a layer of substantially transparent adhesive, wherein the other of said opposed surfaces is smooth surface, wherein said optically decorative product further comprises a layer of reflective metallic material applied to said smooth surface and wherein said optically decorative product further comprises a layer of product mounting adhesive applied to said layer of reflective metallic material.

12. (currently amended) The optically decorative product according to claim 1 wherein the other of said opposed surfaces is a smooth surface and
